Thank you for choosing Upper Bounce for your trampoline and trampoline replacement needs! When you select Upper Bounce®, you are choosing high quality trampolines, or replacement parts and accessories. At Upper Bounce® we think about "fun and safety" for the whole family!

Before you are ready to start installing your new Enclosure Set, please verify that the enclosure set you are going to install matches the trampoline size you have.

Measuring Tips For Enclosure Set

These are the steps to make sure you purchased the right Enclosure Set:

STEP

1

FRAME SIZE

Measure your frame from one outside edge vertically and horizontally to the other outside edge so you get the correct measurements.

STEP

2

POLE AMOUNT

Count the legs. The amount of W shaped legs you have that's the amount of poles you will need.

Fig. 1

or connect 2 poles to each leg as shown in figure 2.

Fig. 2

For example - if your legs count is 6 W shaped legs you need 6 poles. If it counts 4 legs you can either take 4 poles for every second leg (Fig. 1) or 8 poles (Fig. 2).

STEP

3

POLE CONNECTOR

Check the diameter of the leg to make sure the pole connecting tool fits your Trampoline, If the Pole diameter is 1 inch you need to look for a 1 inch connector if its 1 ½ you need a 1 ½ connector.

Note: You can also connect the poles to the leg with U shape connector Model UBHWD-UB-12 for set of 12 and model UBHWD-UB-16 for set of 15.

Based on the

1) Frame Size

2) Leg Amount

3) Leg Diameter

Determine if you bought the correct Enclosure Set

Measuring Tips For Enclosure Net

If you purchased an enclosure net only

1. Make Sure the Net size matches the frame size (see above how to measure the frame size).
2. Make sure the poles/arch amount of the product matches the amount of your trampoline.
3. Make sure the height of the product is matching to the height of your existing poles or arches.

Height chart of all type of nets	
7.5 ft	65"
8 ft	65"
10 ft	64"
12 ft and +	71"

Pole Installation Instructions

Warning :

2 adults in good physical condition are required for the following assembly. Wear proper shoes and maintain balance to prevent a fall. Failure to follow all instructions and warnings may result in serious injury.

1. First, place all parts to be used in the process of installation in front of you.

2. Take the clamp and clasp the trampoline pole into the smaller hole of the 8-Shaped Pole Clamp. (serves as the pole and leg connector),

3. Once the pole is securely inserted into the clamp you can now clasp the leg into the larger hole of the clamp. Making sure that the black rubber cap of the lower pole faces down.

4. Be aware that the mark on the lower pole needs to align with the trampoline frame. If there is no line on the pole then please have it attached 18" below the frame.

5. The set comes with 2 clamps per pole. One being attached 2" **below** frame, while the other being attached 2" **above** the end of the lower pole.

6. Feed the screw through the screw hole thus tightening the clamp to securely connect it to your trampoline leg with the tool included.

7. Now you can have the upper part of the pole inserted into the lower part that is already attached to the leg.

8. Repeat the steps above to have all your enclosure poles connected securely to your trampoline legs.

9. After connecting all Enclosure Poles insert the Pole caps, if you have an Inside Type Net use part number E1 and for outside type Net use E2

For inside Type Net E-1

For outside type Net E-2

After you installed the Poles you should install the Enclosure Net, for instructions how to install the Enclosure Net see Below the inside type model and the outside type choose the one applies to your purchase,

STEP

1

INSERT THE NET TO THE POLES

Start installing the Net to the poles by inserting the beginning of the Sleeve on the Poles Until it reaches 2 ft. and continue doing the same to all poles as figure 1.

Fig. 1

Pull down each sleeve, a few inches at a time till all sleeves reach the bottom of enclosure frame as shown in figure 2.

Fig. 2

STEP

2

CONNECT BOTTOM STRAPS

Connect bottom straps/clips to every few Jumping mat v-rings from under the Safety Pad. Attach the clips from outside as figure shows.

STEP

1

Start by running the Fiberglass Rods through the sleeves opening at the upper edge of the safety net until you reach the other side of the sleeve as figure 1.

STEP

2

After inserting the top rods through all the sleeves you need to connect all rods together, there is several ways to connect it:

1. With T pole caps as figure 1.

2. With nuts that connects it together with Adjustable Wrench as figure 2.

STEP

3

Repeat with remaining rods until everything is connected together. To make the last connection have one person stand on the opposite side, push the rods towards the center of the ring until they are in line with each other and make the last connection as shown in picture.

STEP 4

Raise the net up into position and connect the rods to the poles with the following options:

Option 1 -

If you have T connectors Insert the T-shaped Pole Caps into the upper poles as shown in picture.

Option 2 -

If your rod is connected in any other way, connect the rod to the pole cap by clicking it in as figure shows.

STEP 5

Connect the bottom clips to the v rings by hooking it up to every few v rings.

Enclosure Net Safety Checks:

- Hold onto pole net jacket and check that all the enclosure poles are sturdy by shaking it.
- Check the enclosure net and pole jacket for any tearing in the stitching or material.
- Check the enclosure net zipper and entrance hooks function properly.
- Check to see if all safety enclosure hook are attached to the triangle ring under the trampoline.

WARNING:

1. Please ensure that the safety enclosure net zipper is 100% closed and all three entrance hooks are re-hooked before jumping.
2. Do not intentionally jump into the safety net, it is only designed to stop persons from falling off the trampoline. Intentional jumping into the safety net may cause the trampoline to topple over, or may damage your net. Abuse of the safety net is considered negligent use which is not covered by the warranty, please refer to the disclaimer.

After reading this entire manual and you still have any questions or concerns ?
